

ULTIMATE CONTROL

Overview

Ultimate Control specializes in the consultation, design and installation of entertainment, lighting, environmental, power, and security control systems. Our professional design engineers, project managers and installation technicians are well equipped to meet the needs of any new construction, renovation, or retro-fit project.

We operate six specialized field divisions — Design Engineering, Low Voltage, Electrical, Security, Theater Design & Construction, and Customer Service. Each division is organized as an independent workforce, with specialists trained in specific disciplines.

Design Engineering

- Project proposals
- Floor plan & elevation drawings
- Product specifications
- Equipment space, ventilation and electrical requirements
- Design construction, and as-built documentation

Low Voltage (C-7)

- Whole home audio & video
- Integrated control systems
- Phone / Data / TV wiring
- Home networking
- Integrated telephone & intercom systems

Electrical (C-10)

- Line voltage electrical design
- Lighting control systems
- Energy management solutions
- Emergency power solutions
- Automated window treatments

Security (C-22)

- Fire / Life / Safety systems and design
- Video surveillance
- Integrated access control
- 24-hour security monitoring

Theater Design

- Custom theater design
- Dedicated theater & media rooms
- Acoustical design & engineering

Service

- Full service support
- Warranty & extended warranty plans and services
- Dedicated service team & service fleet
- Post warranty service
